THE MVP PRO

Key Programming System

In compliance with current regulations relating to industrial property, we hereby state that the trademarks or trade names mentioned in this document are the exclusive property of authorized manufacturers of locks and users. Said trademarks or trade names are nominated only for the purposes of information so that any lock for which our keys are made can be rapidly identified. This document is reserved exclusively for professional key cutters who use Ilco products. / All information and illustrations in this document are for guidance only. Ilco reserves the right to alter products designs, dimensions or info to improve the products quality. The contents of this document are fully protected by Copyright and may not be copied or reproduced in any form, without written permission from Ilco. Any controversy shall be settled by the Courts of Justice where the company has its headquarters, with express exclusion of any other court. Brand names and/or trademarks shown are the intellectual property of the respective companies

THE MVP PRO

Key Programming System

If you are new to the industry or simply looking for a cost effective way to offer a key programming service to your customers, then the MVP Pro is the solution. Designed and engineered in the UK by Advanced Diagnostics, the pioneering and trustworthy manufacturer for after- market key programming tools, the MVP Pro is ideal for auto technicians and locksmiths providing high quality key and remote programming services on a 'pay as you go' basis. All new software is free. Additional "tokens" can be purchased from your local distributor. In general, it only takes one token per job.

FUNCTIONALITIES

- › Read and clear fault codes
- › Clear key memory
- › Program keys, proximity keys, smart keys, flip keys, remotes
- › Program aftermarket and OEM keys and fobs
- › Read immobilizer pin codes
- › Read pre-code data
- › Display live data
- › Component actuation
- › ECU identification
- › Simple user interface

Some of the functions above are make/model dependent

MVP PRO KIT

- › The MVP Pro programmer
- › Software (all manufactures)
- › Smartcard and calculator
- › Protective carrying case
- › Neoprene tester case
- › Operating manual
- › Cables and dongles
- › Dongle case

TECHNICAL DATA

Power: 12v DC from vehicle

Display: 320x240 pixel backlit LCD touch screen with adjustable contrast

Connection: via OBD socket in vehicle

Interface: CAN bus, USB

Multiple system protocols

Dimensions: Length: 10.31"/262mm, Depth: 8.58"/218mm, Height: 1.85"/47mm

Weight: 2.4lbs/1.09kg

MVP PRO

A new opportunity for your business

The MVP Pro can be a worthwhile asset and generate an excellent return on your investment, by opening an additional income stream for your business: that of vehicle key and remote programming using specialist diagnostic equipment, a service originally provided almost exclusively by franchised dealers.

Cutting-edge, cost-effective solution

The MVP Pro offers the same coverage and functionality as the world leading T-Code Pro, but at a fraction of the cost thanks to the use of digital tokens, which are deducted when keys are programmed. When all the tokens are used, you simply purchase tokens and download them via the Internet.

Free and constantly updated software for all makes and models

The MVP Pro is supplied with all available software free. Software is continually being developed by Advanced Diagnostics for most car manufacturers worldwide. When new software modules are released, they can be easily downloaded onto the MVP Pro free of charge via the Internet.

Advanced, user-friendly technology

Designed with simplicity in mind, the MVP Pro is a portable device that guides you through various processes for key and remote key fob programming, from the more basic keys to proximity and smart keys across all makes and models worldwide.

Pin code reading function

Some vehicle immobilizer systems require security access (pin code) to allow keys or remotes to be programmed. The MVP Pro can read many pin codes, and where they cannot be read, Advanced Diagnostics offer a service to customers to obtain them.

Protection for your investment

The MVP Pro is designed with built-in security which keeps your investment protected. For additional security, we apply a smartcard and a calculator, similar to the security devices used by the banking industry.

Smart Dongle

Smart Dongle provides 'one easy to use solution' that replaces all dongles with one automatic configurable dongle. Its built in calculator alleviates the need for smartcards, while its extra ports support future hardware innovations.
