

New Software Release

SUBARU® 2018 KEY PROGRAMMING ADS2286

February 2019

Advanced Diagnostics is pleased to announce the release of Subaru® 2018 ADS2286 key programming software for Subaru® vehicles in USA only at this time. Canadian models are not yet covered.

What does the software do?

ADS2286 software allows for H bladed keys and remotes to be added and programmed when an existing transponder key is present. The software can erase the keys (the key in the ignition is not erased) and program new keys (Max. of 4 Keys/Remotes). The software has been designed to bypass the security automatically in the background making it a seamless process when programming keys.

Please see the application list below for vehicle coverage or on Info Quest.

Note: This software is available for Smart Pro only and a working transponder key is required to program transponders and remotes.

A working Remote does not need to be present when programming remotes. ALL KEYS LOST functionality is NOT available at this time for H bladed keys.

What else will I need?

Smart Pro
