

Effective May 2017

## Advanced Diagnostics USA UTP Expiration Policy

1. A UTP subscription must be renewed on or before the expiration date.
2. Failure to renew on or before expiration date; user will be given a 10 day “Grace Period” to renew.
3. If renewed during “Grace Period” UTP will continue without interruption and the UTP plan will maintain its original monthly or annual expiration date.
4. If UTP subscription is NOT renewed within the 10 day “Grace Period,” the plan will be terminated and all remaining tokens will be removed from the tester.
5. A \$250 USD Administration Fee will be charge to renew UTP after 10 day “Grace Period.” All orders incurring the Administration Fee will have a separate line on the invoice, part number TT0336XXXX.
6. The maximum penalty for exceeding the 10-day grace period would be the \$250 USD Administration Fee.
7. Once renewed and the Administration Fee is paid, UTP subscription will have new expiration date based on renewal date.

In case the customer should move from the UTP to Tokens, we would deduct 1 token per each day of grace period the customer has used. **EXAMPLE:** *The customer has used all 10-day “Grace Period”, then orders a 20-token pack, it will have only 10 tokens available because of the deduction.*

*Kaba Ilco Corp. / Advanced Diagnostics USA reserves the right to change the UTP Program Expiration Policy and any pricing shown at any time, without notice.*
