

Key Programming Software Update Jaguar/Land Rover® ADS2207

October 2021

Advanced Diagnostics is pleased to announce an update of the ADS2207 key programming software for Jaguar®, Land Rover®, and Range Rover® to include models with the Keyless Vehicle Module (KVM) that have a DPLA part number.

What does the software do?

The ADS2207 software programs proximity keys for select popular Jaguar® and Land Rover® models. Keys can be added or programmed from a lost key situation and the process has been designed to bypass the PIN code automatically making it a single, seamless operation. The proximity key and remote functions are programmed simultaneously.

Note: This software is available for Smart Pro only.

What else will I need?

Smart Pro

OFFER DETAILS

Cable	ADC2000B
Smart Aerial required	No
Software category	A
Other accessories required	No
