

## Key Programming Software 2022 Nissan® ADS2326

September 2022

Advanced Diagnostics is pleased to announce a new update for ADS2326 Nissan 2022. The new update adds the capability to program proximity fobs for select Nissan and Mitsubishi models.

### What does the software do?

ADS2326 Programs proximity keys for popular models like the Sentra, Rogue, and Mitsubishi Outlander. All keys will be erased and can be programmed back in during the procedure (all keys to be programmed must be present.) The software bypasses the security PIN code and programs the remote and transponder at the same time. On some models a working key is required. Some other models are possible without a working key (See applications chart). The all-new ADC2017 cable is required to complete the programming procedure.

### Server Connection NOT Required

ADS2326 software is stand-alone and does not require an internet connection.

### What else will I need?

Smart Pro

ADC2017

### OFFER DETAILS

Cable	ADC2000B or ADC2013
Smart Aerial required	No
Software category	A
Other accessories required	ADC2017 Nissan Bypass Cable

\* Based on active testing in the field, some variation may occur, we cannot guarantee success on ALL listed vehicles. We cannot guarantee that the OEM does not update or change their security which is beyond our control. Success has been at or near 100% on the vehicles shown here.
