

Key Programming Software Update Volkswagen®/Audi® ADS2323

August 2022

Advanced Diagnostics is pleased to announce a new update for ADS2323 Volkswagen/Audi. The new update adds the capability to program slot keys for select Audi models.

What does the software do?

ADS2323 programs keys for select late model Audi® vehicles with slot key ignitions (BCM2 system) without the need of an already working existing key. The software supports both ALL KEYS LOST and duplicating keys. All keys will be erased and can be programmed back in during the procedure. (all keys to be programmed must be present.) The software will pre-code & program after-market keys using the car so the Smart Aerial is not required. Smart Aerial can be utilized to potentially "virginize" existing keys so that may be then re-used. Dealer pre-coded keys can also be used, but are not required.

A maximum of 8 keys/remotes can be programmed. This capability added in this software update is available on Smart Pro only and does not require any access to the internet.

What else will I need?

Smart Pro

Smart Aerial (optional)

OFFER DETAILS

Cable	ADC2000B or ADC2013
Smart Aerial required	Optional to Virginize Keys
Software category	C
Other accessories required	No

* Based on active testing in the field, some variation may occur, we cannot guarantee success on ALL listed vehicles. We cannot guarantee that the OEM does not update or change their security which is beyond our control. Success has been at or near 100% on the vehicles shown here.
